## Description of the Study Program

<b>Communication and Media Science</b>	
The higher educational institution responsible for the study program	University of Dunaújváros (Dunaújvárosi Egyetem)
Identification number of the higher educational institution	FI60345
Address	1/A Táncsics Mihály utca, 2400 Dunaújváros, Hungary
Head of the higher educational institution	Dr habil. István András, Ph.D., Rector
<b>People responsible for the study program</b>	
The institute responsible for the study program	Social Sciences Institute
Director of the institute (name, scientific degree)	Dr. László Balázs Ph.D., Associate Professor
Responsible person for the study program (name, scientific degree)	Dr. László Balázs Ph.D., Associate Professor
<b>Specializations and the person responsible for the specialization (name, scientific degree)</b>	
Media Informatics specialisation	Dr. Péter Ludik College Professor
Business Communication Specialization	Dr. habil István András College Teacher
<b>Details of the study program</b>	
Entry requirements	General Certificate of Education/High School Diploma
Level	undergraduate
Qualification	Bachelor of Arts (BA)
Description of the qualification in Hungarian	Kommunikátor
Description of the qualification in English	Expert in Communication

## Communication and Media Science

2020

Duration of study	6 semesters
Credit points to be acquired	180
Educational goals of the study program	The aim of the study program is to train such professionals who are acquainted with the various organizations and institutions operating in the diverse field of communication. They are familiar with the scenes of social communication, the structure of its institutions, the main organizations of communication and the media, as well as their operation. Based on their knowledge, skills and attitudes acquired in the program, they are fully competent to perform communication related tasks in the various organizations operating in the field of communication. They are also ready to pursue their studies on master's level.
Prerequisite(s) of selecting a specialization	A minimum of one specialization is to be started in the semester indicated in the curriculum, which is the one most students apply for. The precondition of starting two specializations is to have a minimum of 10 students applying for each.
Prerequisite(s) of starting a specialization and the way of classification	
Work placement/Internship	A minimum of 80 hours long work placement at an organization operating in one of the various fields of communication.
Prerequisite(s) of issuing the pre-degree certificate (absolutorium)	The pre-degree certificate (absolutorium) certifies the successful completion of the exams and other study requirements as defined in the curriculum, with the exception of those for the thesis and the foreign language examination. It also confirms the attainment of the required number of credit points, with the exception of those earned by the thesis. This certificate confirms, without a qualification or evaluation, that the student has fulfilled all the study and exam requirements defined in the curriculum of the study program.
Thesis	The aim of thesis writing is the application and synthesis of the knowledge attained during the

## Communication and Media Science

2020

	<p>study program. By their thesis students prove that they are able to solve complex professional problems, apply the theoretical and practical knowledge and methods acquired in their studies, and are familiar with the professional literature of the field. The general regulations on thesis writing can be found in <i>TVSZ</i>, the study and exam regulations of the university.</p>
Prerequisite(s) of the final exam	<p>The prerequisites of the final exam are the attainment of the pre-degree certificate (absolutorium) and the submission of the thesis (approved for review).</p>
The final exam	<p>The aim of the final exam is to check and assess the knowledge, skills and abilities required for the obtaining of a certificate on the study program. Students are also expected to prove their competence in applying the acquired theoretical knowledge in professional practice. The final exam consists of defending the student's thesis and an oral exam on the subjects defined in the curriculum (FES1, FES2)</p>
Subjects of the final exam	<p><b>Final Exam Subjects 1 (FES1) (Complex):</b>  TKM-006 Major Scenes and Instruments of Communication  TKM-010 Specific fields of Media and Communication  TKM-XXX Communication and Culture  TKM-008 Social Communication  TKM-005 Social History of Communication and Media</p> <p><b>Final Exam Subjects 2 (FES2) (Specialization):</b></p> <p><u>ZV2/1 – Media Informatics:</u>  TKM-018 Digital Image Creating  TKM-019 Motion picture creation and sound recording  TKM-021 Multimedia I.</p> <p><u>ZV2/2 – Business Communication:</u>  TKM-024 Conflict Management and Economic Mediation</p>

## Communication and Media Science

2020

	TKM-028 Business Negotiation and Presentation TKM-XXX Public relations I. TKM-025 Organizational Communication
Average of the certificate	The average of the certificate should be calculated in the following way: $(FE + D + SA)/3$ . Where (FE) is the mathematical average of the marks of the final exam subjects (FES1, FES2); (D) is the mark awarded for the thesis by the final exam committee; and (SA) is the cumulative average of the study marks weighted with the credits points obtained by the student.
Qualification of the certificate	excellent 4,51 - 5,00 good 3,51 - 4,50 satisfactory 2,51 - 3,50 pass 2,00 - 2,50
Preconditions of issuing the certificate	The preconditions of issuing the certificate are a successful final exam and the passing of the required foreign language exam.  The mother tongue of a foreign student is qualified as advanced language exam according to the Hungarian regulations.
Language Training	English
Physical Education	One lesson per week (only on the full time program)

# Communication and Media Science

2020

Study mode	Full time, part-time
Required competencies:	
<p>a. knowledge</p> <ul style="list-style-type: none"> <li>- acquires the knowledge of main definitions and principles connected to social science, understands the interdependences, which form the basis of society and the academic interpretations of social communication;</li> <li>- acquires the knowledge of the correlations related to the operation of society, the academic contexts connected to these;</li> <li>- acquires and understands the operational mechanism of social phenomena and its subsystems examined by the Communication and Media Sciences;</li> <li>- acquires the knowledge to review the various fields of social communication correctly within the correlations of social communication, as for the normative system and operational practice of institutions like economics, politics, science, art, morality, religion, language, law;</li> <li>- acquires the knowledge of the most important factors of social, structural, economic and political processes that determine the field of Communication and Media Sciences;</li> <li>- acquires a self-confident methodological knowledge, understands and reviews the possibilities and perspectives of methodological innovation;</li> </ul> <p>b. abilities</p> <ul style="list-style-type: none"> <li>- able to find a way in the deeper interdependences of the field of specialization and the actual social, communicational and media science problems occurred during practice, and the possible methods for solution;</li> <li>- able to process the latest knowledge of the field of specialization effectively;</li> <li>- able to handle self-confidently the printed and digital specialized literature resources, the databases of social science and media research and the appliances serve their operating;</li> <li>- able to make the synthetic collocation of the basic theories and conceptions of social communication, make rational argumentations, in other words able to form and protect opinion during the discussions in different fields of communication;</li> <li>- on the basis of elementary level theoretical preparedness able to work out the work hypothesis concerning the exploration and examination of the real relations on the fields of social communication and able to work out the most suitable empirical method to examine this and the conception of the procedure;</li> <li>- able to analyse profound and in details the facts revealed at the levels and stages of communication got to know during the theoretical and practical work and able to explore the interdependences coming from the results;</li> <li>- able to adjudicate the information of the fields of communication and media research correctly and able to define own suggestions building upon the consequences of these;</li> <li>- able to use the professional vocabulary, the professional basic definitions of the profession and the elements of the professional lexis built upon them confidently during professional usage;</li> <li>- able to make decisions in decision processes in correlation with the field of specialization (interpersonal, group, public, organizational, intercultural and mass communicational) at the level of practical application;</li> </ul>	

## Communication and Media Science

2020

### c. attitude

- open to the value-based reception of social changes; susceptible to adapting views which combat prejudices;
- accepts the fact that cultural phenomena are historically determined and changing;
- accepts the religious and social historical and contemporary diversity of the Hungarian and European identity;
- has a desire for understanding cultures outside Europe; is open and accepts these cultures;
- accepts and consistently adheres to the versatile approach of social sciences, and authentically represents it in his/ her immediate surroundings and beyond;
- open and sensitive to the most serious social problems; professional and human solidarity with the deprived and vulnerable has a ubiquitous presence throughout his/ her perspective;
- committed to social equality, democratic values in all spheres of life, respect for the rule of law and the European community of values, and is able to formulate his/ her opinion in an appropriate way;
- open to all forms of professional innovation; inclusive but does not accept theoretical, practical or methodological innovations unthinkingly;
- open to critical self-evaluation, to the various forms of continuous training, to the self-development methods of the intellectual worldview, and puts efforts into self-development;
- able to acquire and constantly develop communication skills, and capable of self-reflexion of his/ her abilities in this field;
- supports confidently and with responsibility, in all forms of cooperation, the consistent compliance with and protection of the legal, ethical and professional norms of the society and in his/ her own professional field and workplace;
- consciously represents the methodology that he/ she applies in his/ her profession, and accepts the diverse methodological phenomena of other academic disciplines;
- accepts and practises the attitudes and behaviours related to health protection;

### d. autonomy and responsibility

- plays an independent and pro-active role in promoting acceptance of his/ her adopted view of society in the professional circles specialised in communication and media science;
- in his/ her own professional circle, develops a historically and politically coherent individual attitude which helps the development and raises the awareness of his/ her own self and the surrounding people;
- having become part of a professional working community, he/ she is able to perform or control complex tasks in accordance with professional requirements;
- organises his/her work with independence and responsibility as expected in accordance with his/ her position in the organisational structure;
- formulates views as a sovereign person in professional and social forums; responsibly represents his/ her profession, organisation and trade/ professional group;
- independent, constructive and assertive in the forms of cooperation inside and outside the institution;

## Communication and Media Science

2020

- takes responsibility for the specialised native or foreign language texts prepared by him/ her and is aware of the possible consequences.

## Course descriptions of the Communication and Media Science study program

Subject name		In Hungarian		Bevezetés a társadalomtudományi kutatásokba				Szintje	A	
		In English		Introduction to Social Research				Level	A	
Subject code				DUEN-TKM-112						
Responsible educational unit				Institute for Social Sciences						
Name of Mandatory Preliminary Study										
Number of Lessons								Requirements	Credits (ECTS)	Language of Education
		Lecture		Seminar		Laboratory				
Full-time	150/39		1		2		0	CA	5	English
Correspondence	150/15		5		10		0			
Teacher responsible for the course				Name		Dr. Mariann Vácz			Position	College Professor
Educational goals				The goal of the subject is to prepare for being able to acquire basic research methods, to discover social phenomena and correlations.  The second goal of the subject is to acquire the usage of various social research methods in practice.						
Typical delivery methods				Lecture		In a classroom with the use of projector or computer in each lecture.				
				Seminar		Preparing research plans and carrying out social reseraches, and presenting the results in team work or individually.				
				Laboratory						
Requirements (expressed in learning outcomes/competencies to be acquired)				Knowledge Students know the goals of social researches and their functions in the society life. Students are aware of the ethics of research and researchers' ethical attitude. Students know the way of defining the research problem. Students know the difference between the concept of population and sample, and they know different sample techniques. Students know the suitable sources for finding authentic literature. Students know the concept of hypothesis. Students know the different research methods, their opportunities of application, their advantages and disadvantages in research process. Students know how to analyze research data, they know both quantitative and qualitative methods of analysis. Students know the rules of the publication of research results.						

# Communication and Media Science

2020

	<p><b>Ability</b></p> <p>Students will be able to:</p> <ul style="list-style-type: none"> <li>• define a research problem;</li> <li>• operationalize concepts and define hypothesis;</li> <li>• select the most suitable sample technique, and to select a representative sample;</li> <li>• select and apply the most suitable sample research method;</li> <li>• statistically analyze data;</li> <li>• do qualitative analysis on textual data</li> </ul>
	<p><b>Attitude</b></p> <p>They are committed to learn social phenomena.</p> <p>They are open to cooperate with others.</p> <p>They are open to discover social correlations.</p> <p>They have objective and unbiased attitude towards research subjects and research data.</p>
	<p><b>Autonomy and responsibility</b></p> <p>They are responsible for keeping the ethical requirements of social research. They defend subjects participating in the research.</p> <p>They publicate research results in a correct way, taking responsibility for experienced and publicated research results and correlations.</p>
<b>Brief description of the subject content</b>	<p>The concept and the types of social researches. Typical features of social research. Scientific conditions of research: validity, reliability, and objectivity. Study the research problem with the help of scientific literature. Planning and timing of the research. Analysis of documents and sources. Formulating the hypothesis of the research. Generalization of the results. Selecting the sample, different sampling techniques. Empirical research methods. Application of observation, its types and recording techniques. Methods of surveying: questionnaire and interview. Role of experiment, its types, planning and carrying out.</p> <p>Analysis of research results with computer. Basic of SPSS. Different statistical analysis. Analysis of qualitative data.</p>
<b>Activity forms of students</b>	<p>Do research plan and pilot research. Carry out a small research in team work or individually: carry out survey research (questionnaire or interview) in real life situations. Presenting research results.</p>
<b>Compulsory reading and its availability</b>	<p>BABBIE, Earl (2007): The Practice of Social Research. Thomson Higher Education. Belmont, USA.</p>
<b>Recommended reading and its availability</b>	<p>Berg, L. Bruce (2004): Qualitative Research Methods for Social Sciences. Pearson Education. USA</p> <p>Crawley, M. J. (2002): Statistical computing : an introduction to data</p>

# Communication and Media Science

2020

	analysis using S-Plus.
<b>Hand-in Assignments/ measurement reports</b>	Students have to do a research plan and carry out a small research, analyze the data, and present the whole process and the results of the research.
<b>Description of midterm tests</b>	<p>Present research plan – 4-5. week of the semester.</p> <p>Present the research and research results – 12-13. week of the semester.</p> <p>Writing test: theoretical questions about social research – 8. week of the semester.</p> <p>Correcting grade: in exam period.</p>

2020

Subject name		In Hungarian		Kommunikáció és kultúra				Szintje	A	
		In English		Communication and Culture				Level	A	
Subject code				DUEN-TKM-116						
Responsible educational unit				Institute for Social Sciences Department of Communication and Media						
Name of Mandatory Preliminary Study										
Number of Lessons								Requirements	Credits (ECTS)	Language of Education
		Lecture		Seminar		Laboratory				
Full-time	150/39		1		2		0	CA	5	English
Correspondence	150/15		5		10		0	(Continuous assessment)		
Teacher responsible for the course				Name		Dr. Andrea Györgyi Szalay			Position	College Professor
Educational goals				The objective of the course is the development of the intercultural and transcultural competences of the students, as well as the development of cultural self-reflexive skills. The course focuses on a competence that is indispensable in our globalized world: inter and cross-cultural competences. During the course, students learn to identify the impact of culture on recognition, judgment and action. They learn about the characteristic features of intercultural encounters and communication challenges. They receive guidance for the efficient handling of those challenges.						
				The course develops the following competences: Intercultural and cross cultural competences; self-reflection (individual and cultural levels); flexibility; tolerance						
Typical delivery methods				Lecture		In a classroom with the use of projector or computer in each lecture.				
				Seminar		In seminar rooms seating 20-30 people, with the use of a projector. Individual, pair and group work; case study analysis. Student presentations, evaluation.				
				Laboratory						
Requirements (expressed in learning outcomes/competencies to be acquired)				Knowledge						
				Students know the main conceptual repertoire and approaches of culture research.						
				They are familiar with Hungarian cultural studies within the light of international culture research.						
				They know the communication strategies that enhance the efficiency of intercultural encounters.						
				Ability						
				Students are able to handle the ambiguities and uncertainties that come from cultural differences.						
				They are able to judge and evaluate cultural phenomena of different cultures according to their own standards and values.						
				They are able to identify the impact of culture on organizational operations, and handle them as necessary.						
				Attitude						
				The student aims at cultural self-reflection when they encounter different cultures.						
				They tolerate the ambiguities and uncertainties that come from cultural differences.						
				They are open to understanding behaviors that are initially foreign to them.						
				Autonomy and responsibility						

# Communication and Media Science

2020

	Students take an active role in fighting against cultural and social prejudice.
<b>Brief description of the subject content</b>	During the course, students learn the main approaches and terminologies of culture research and cultural studies. Against the backdrop of international cultural studies, they learn about characteristics of Hungarian cultural phenomena. Students will be able to understand and assess Hungarian and international cultural phenomena in the light of their cultural context. They learn about the impact of culture on behavior and communication, and they acquire the communicative strategies that help them face intercultural misunderstandings.
<b>Activity forms of students</b>	Note taking and synthesis of lectures. Participation in cooperative activities and role-play; the analysis of case studies; complex simulations (problem solving in the group. The discussion of alternative solutions); experimental tasks (exercises)

# Communication and Media Science

2020

Subject name		In Hungarian		Kommunikáció és média társadalomtörténete			Szintje	A	
		In English		Social History of Media and Communication			Level	A	
Subject code				DUEN-TKM-252					
Responsible educational unit				Institute for Social Sciences Department of Communication and Media					
Name of Mandatory Preliminary Study									
Number of Lessons							Requirements	Credits (ECTS)	Language of Education
		Lecture		Seminar		Laboratory			
Full-time	150/39		2		1	0	E	5	English
Correspondence	150/15		10		5	0	(Examination)		
Teacher responsible for the course				Name		Dr. László Balázs		Position	Associate Professor
Educational goals				The objective is to learn about the social history of media and communication. Students learn about the communication systems of society, and the institutions of communication and media throughout history. Through the social history of communication and media, students will be able to properly assess the issues and controversies of social communication. The objective of the course is that students objectively regard and interpret the social traditional systems of communication through a longitudinal perspective.					
Typical delivery methods				Lecture		In a classroom with the use of projector or computer in each lecture.			
				Seminar		In a classroom with the use of projector or computer in each seminar.			
				Laboratory					
Requirements (expressed in learning outcomes/competencies to be acquired)				Knowledge Students know the basic conceptual tool kit of the discipline. They understand the relationship between concepts and processes that form the bases of social scientific interpretation. Students know and place communicative media in time and space, and understand their social significance. They understand the different schools of the social history of communication, and are able to critically assess them. At a basic level, students learn to analyze the characteristic operations of media technologies and processes in different historical contexts. They are familiar with the most important characteristic features of the social, structural, economic and political historical contexts in which communication is embedded.					
				Ability Students are familiar with the deeper interrelations between the specific areas of their subject of study, as well as the specific social problems and their potential solutions. They are able to research, and gather information independently in their own subject area. They are aware of the historical development of schools of communication, as well as their perspectives. Students are able to take a position with regards to the different interpretations of communication epochs, and are able to assess the difference with regards to the social role of communication in diverse historical eras, including the social impact of communication and media channels. Within their subject area, students are able to form well-informed arguments, identify problem areas, and propose solutions.					
				Attitude Students possess a critical attitude with regards to the discourses that concern social problems. They are committed to social equality, democratic values, the state of law, and European values. Students are open to the various forms of independent learning, and professional innovation. Students are tolerant and

2020

				In English				Official Communication				Level		A	
Subject code				DUEN-TKM-115											
Responsible educational unit				Institute for Social Sciences Department of Communication and Media											
Name of Mandatory Preliminary Study															
Number of Lessons												Requirements	Credits (ECTS)	Language of Education	
		Lecture		Seminar		Laboratory									
Full-time	150/39		1		2		0	CA	5	English					
Correspondence	150/15		5		10		0	(Continuous assessment)							
Teacher responsible for the course				Name				Dr. habil István András				Position		College Teacher	
Educational goals				<p>The objective of the course is that students acquire all the skills and competences that are necessary for interpersonal communication in a personal and business context, with special attention to correspondence. Throughout the semester students learn the formal, structural and linguistic requirements of correspondence, as well as the conceptual repertoire and formulae of academic writing. Students will learn the strategies of academic writing including the structuring of an essay, stylistic questions, and the proper referencing of cited and paraphrased material</p> <p>The course draws on research seminars and communication seminars to help students acquire the basic skills of written communication. The objective of the seminar is to help students use the formulae of academic writing for their senior thesis.</p>											
Typical delivery methods				Lecture		In a classroom with the use of projector or computer in each lecture. Note taking.									
				Seminar		In a classroom with the use of flipchart, a projector or computer in each seminar. Pair and group work.									
				Laboratory											
Requirements (expressed in learning outcomes/competencies to be acquired)				Knowledge											
				<p>Students know the conceptual apparatus and formal requirements of official and formal correspondence. They know the expectations of academic work and writing, its main steps and processes. They have insight into the narrative aspects used in academic writing and formal, business correspondence. They know the ethical, moral, and stylistic requirements of written communication. Students are aware of the different style guides used in academic writing, their respective rules and differences. They know the reasons for proper citation, and they know how to use the formal systems of referencing in a piece of academic writing.</p>											
				Ability											
				<p>Students are able to deploy the appropriate stylistic and formal apparatus of written communication according to the context and genre of writing. Students are able to use the formal and stylistic requirements of formal correspondence. They are able to use the same in academic texts such as their senior thesis. They are able to properly use a system of citations and references on the basis of their established protocol.</p>											
				<p>Students are familiar with the deeper interrelations between the specific areas of their subject of study, as well as the specific social problems and their potential solutions. They are able to research, and gather information independently in their own subject area. Within their subject area of the specific fields of communication, students are able to form well-informed arguments, identify problem areas, and propose solutions.</p>

# Communication and Media Science

2020

Subject name		In Hungarian		Kommunikáció és a média sajátos szinterei				Szintje	A	
		In English		Specific fields of media and communication				Level	A	
Subject code				DUEN-TKM-151						
Responsible educational unit				Institute for Social Sciences Department of Communication and Media						
Name of Mandatory Preliminary Study										
Number of Lessons								Requirements	Credits (ECTS)	Language of Education
		Lecture		Seminar		Laboratory				
Full-time	150/39		1		2		0	E	5	English
Correspondence	150/15		5		10		5	(Examination)		
Teacher responsible for the course				Name		Dr. Katalin Kukorelli			Position	College Teacher
Educational goals				The objective of the course is to familiarize students with the various forms and presentation technologies of communication, including their genre specific vocabulary and conceptual apparatus, presentational rhetoric, including the impact of the specific spheres of communication on the semantic horizons and possibilities of communication. The class will address the rites of strategies of reception, mass media, and globalization. Students will learn about the role of media in social processes, identity construction, and socialization. Students will examine the structures of the communication technologies and the pragmatics of reception. Students will learn about the various registers that communication uses in different spheres.						
Typical delivery methods				Lecture		In a classroom with the use of projector or computer in each lecture.				
				Seminar		In a classroom with the use of projector or computer in each seminar.				
				Laboratory						
Requirements (expressed in learning outcomes/competencies to be acquired)				Knowledge Students know the basic conceptual tool kit of the discipline. They understand the relationship between concepts and processes that form the bases of social scientific interpretation in the area of communication. At a basic level, students learn to analyze the characteristic operations of media technologies and processes in different historical contexts. They are familiar with the most important characteristic features of the social, structural, economic and political contexts in which communication is embedded, and how fields and registers of communication change depending on that context. Students review and have a critical assessment of the various interpretations, theories and schools of communication with regards to the fields of communication.						
				Ability Students are familiar with the deeper interrelations between the specific areas of their subject of study, as well as the specific social problems and their potential solutions. They are able to research, and gather information independently in their own subject area. They are aware of the historical development of schools of communication, as well as their perspectives. Students are able to take a position with regards to the different interpretations and theories of communication, and are able to assess the difference with regards to the social role of communication in diverse historical eras, including the social impact of communication and media channels. Within their subject area of the specific fields of communication, students are able to form well-informed arguments, identify problem areas, and propose solutions.						
				Attitude						

# Communication and Media Science

2020

	<p>Students possess a critical attitude with regards to the discourses that concern social problems. They are committed to social equality, democratic values, the state of law, and European values. Students are open to the various forms of independent learning, and professional innovation. Students are tolerant and open-minded. They are critical thinkers, and possess a degree of empathy that enables them to see various perspectives.</p> <p><b>Autonomy and responsibility</b> On professional and social forums, students voice their ideas in a sovereign and independent way. Students are responsible with regards to cooperation in social issues, their specific disciplinary area, fulfilling the lawful, ethical and professional requirements of their area. Students are proactive in the promotion of their social attitudes and ideas; they have competent argumentative skills in writing as well as speaking.</p>
<b>Brief description of the subject content</b>	<p>Media and socialization. The effect of the media on children. The effect of the media on gender role socialization, gender roles, perceptions of masculinity and femininity. The morphologies of given media, and their language of representation. Communication rhetoric and grammar. Fields and contexts of communication, and the rules they impose on communication. Communication technologies and reception strategies. Optical, print, digital and verbal media. Discourse, narratives and networks. Understanding, reception, and their strategies. Mass media and digitalization. The mass media's effect on our globalized world. The rituals of postmodern media consumption.</p>
<b>Activity forms of students</b>	<p>Note taking 40%</p> <p>Reading compulsory literature 40%</p> <p>Document interpretation 10%</p> <p>Test taking 10%</p>
<b>Compulsory reading and its availability</b>	<p>Wood, Julia T. <i>Communication mosaics: An introduction to the field of communication</i>. Cengage Learning, 2013. Available at the library.</p> <p>Pearson, Judy C., and Paul Edward Nelson. <i>Understanding and sharing: An introduction to speech communication</i>. William C. Brown, 1990. Available at the library.</p> <p>Ildikó, Polyák. <i>Cross-cultural communication</i>. Perfekt, 2004. Available at the library.</p> <p>Wimmer, Roger D., and Joseph R. Dominick. <b>Hand-in Assignments/ measurement reports</b>	Students have to take a final test.
<b>Description of midterm tests</b>	<p>Test: three on semester. Essays on 60 minutes, 6 questions.</p> <p>The method of calculating grades:</p> <p>0-50% fail</p> <p>51-60% pass</p> <p>61-70% satisfactory</p> <p>71-80% good</p> <p>81%- excellent</p>

# Communication and Media Science

2020

Subject name		In Hungarian		Szociálpszichológiai és szociolingvisztikai ismeretek			Szintje	A	
		In English		Social psychology and sociolinguistics			Level	A	
Subject code				DUEN-TKM-154					
Responsible educational unit				Institute for Social Sciences Department of Communication and Media					
Name of Mandatory Preliminary Study									
Number of Lessons							Requirements	Credits (ECTS)	Language of Education
		Lecture		Seminar		Laboratory			
Full-time	150/39		1		2		0	E	English
Correspondence	150/15		5		10		0	(Examination)	
Teacher responsible for the course				Name		Dr. László Balázs		Position	Associate Professor
Educational goals				The objective of the course is that students gain insight into the psychological processes and decision-making processes that play a role in relationships and social structures (group, institution). Students should acquire the theories and concepts of social psychology; they should know the workings of the relational structures of language. The goal of the course is that students are able to recognize and use the linguistic characteristics and dimensions of a social situation. Students should become familiar with the psychological dimensions of the workings and regulations of social situations. They should be competent in handling the structures that define the processes of certain contexts and social situations. The objective of the course is to develop the following competences: Interpersonal skills—empathy, social responsibility, relationship management—accommodation—problem solving, flexibility, reality check.					
Typical delivery methods				Lecture		The discussion of the lecture; exercises for the practice of theoretical angles.			
				Seminar		In seminar rooms seating 20-30 people, with the use of a projector. Individual, pair and group work; case study analysis. Student presentations, evaluation.			
				Laboratory					
Requirements (expressed in learning outcomes/competencies to be acquired)				Knowledge					
				Students know the basic conceptual repertoire and expertise of social psychology and sociolinguistics. They are aware of the toolkit that facilitates the analysis of social situations. They learn the methodologies of analyzing social situations. They have confident methodological knowledge for the analysis of linguistic and social situations. They know the techniques that help them develop their own competences in the subject.					
				Ability					
				Students are able to analyze the positions of the related literature, and synthesize their relationship. They are able to select and use the right tools and methods for specific situations. They are able to identify the situations that support their development and that of their environment; they are able to coordinate situations, and identify the factors that influence them.					
				Attitude					
				Students are open to the execution of group problem solving. They accept and use the tools and techniques at their disposal. They are open to the acceptance of cultural or national differences. They are open to critical self-assessment and development.					
				Autonomy and responsibility					

# Communication and Media Science

2020

	Students are able to carry out their professional work independently. They take responsibility for the processes and their results under their leadership. They support the linguistic autonomy of those in their environment for the sake of carrying out the given task. Their professional work is cooperative.
<b>Brief description of the subject content</b>	See 13-week schedule
<b>Activity forms of students</b>	Note taking and synthesis of lectures. Participation in cooperative activities and role-play; the analysis of case studies; complex simulations (problem solving in the group. The discussion of alternative solutions); experimental tasks (exercises)
<b>Compulsory reading and its availability</b>	Susan T. Fiske Social Beings. Core Motives in Social Psychology. Wile, 2014. Materials on MOODLE
<b>Recommended reading and its availability</b>	
<b>Hand-in Assignments/ measurement reports</b>	The analysis of the movie titled The Wave. The presentation of the factors that influence the construction of social reality—self-analysis. Network analysis—human relationships and language use.
<b>Description of midterm tests</b>	Exam

Subject name		In Hungarian	Vizuális kommunikáció						Szintje	A	
		In English	Visual Communication						Level	A	
Subject code			DUEN-TKM-125								
Responsible educational unit			Institute for Social Sciences Department of Communication and Media								
Name of Mandatory Preliminary Study											
Number of Lessons							Requirements	Credits (ECTS)	Language of Education		
		Lecture	Seminar		Laboratory						
Full-time	150/39		1		2		0	CA (Continuous assessment)	5	English	
Correspondence	150/15		5		10		0				
Teacher responsible for the course			Name		Dr. Mariann Váczi			Position	College Professor		
Educational goals			<p>Students should acquire foundation knowledge about the methods and skills of visual communication, visual expression, visual language and the creation of objects. For this, it is necessary to gain some insight into semiotics as well. It is important that students have an aesthetic sense of value and a firm value judgement. They should be able to talk and write about their visual experiences elaborately. Their aesthetic sensitivity, sense of judgement, critical sense, and environment-conscious behaviour in matters of object culture should develop. The purpose of the seminars is to provide the students with experiential perception and knowledge of different visual genres, gain experience in purposeful design. They should practice independent creation of image representations. Their visual expression ability, aesthetic and critical sensitivity and their acceptance of and interest in others' visual expressions should develop.</p>								
Typical delivery methods			Lecture		Lecture in a large auditorium with a writing board and projector.						
			Seminar		Practical lesson in a classroom with the use of a writing board, projector and computer.						
			Laboratory								
Requirements (expressed in learning outcomes/competencies to be acquired)			<b>Knowledge</b> Students are aware of the most important visual elements of social structural, economic and politic processes which determine the fields of communication and the media. They have confident methodological knowledge; they understand the possibilities and perspectives of methodological innovation.								
			<b>Ability</b> They have an understanding of the most important relationships and the theoretical and practical terminologies of the discipline. They are capable of a diverse and interdisciplinary approach of professional problems. They can see and plan according to the professional requirements. They are able to analyse thoroughly and in detail the phenomena revealed on the levels and scenes of communication identified through their theoretical and practical work, and reveal correlations deduced from the results.								
			<b>Attitude</b> Their professional interest deepens and strengthens. They are able to acquire visual communication skills and perspective, and continuously develop them. They are capable of self-reflexion concerning their capabilities.								
			<b>Autonomy and responsibility</b> They perform specific tasks independently, constructively, using resources.								
Brief description of the subject			Signs and symbols. Modelling and forming

2020

Subject name		In Hungarian	Retorika				Szintje	A	
		In English	Rhetoric				Level	A	
Subject code			DUEN-TKM-255						
Responsible educational unit			Institute for Social Sciences Department of Communication and Media						
Name of Mandatory Preliminary Study									
Number of Lessons:							Requirements	Credit (ECTS)	Language of Education
		Lecture:	Seminar		Laboratory				
Full-time	4	2	2			E	5	English	
Correspondence	20	10	10			(Examination)			
Teacher responsible for the course			Name		Dr. Katalin Kukorelli		Position	College Teacher	
Educational goals			Aims, objectives of developments Introducing rules and customs historically established by general rhetoric. Helping the interpretation of public speech at social stages. Evolving the effective speaking and behaviour of students and improving it in practice.						
Typical Delivery Methods			Lecture		For every student in the lecture hall, during all lessons with the help of projector or overhead projector.				
			Seminar		For every student in a lecture hall with the usage of projector during many lessons.				
			Laboratory						
Requirements (expressed in learning outcomes/competencies to be acquired))			Knowledge Knows the system of social-public communication, the special terminology of theories dealing with this field, and the system of rules formed by general rhetoric. Knows the theoretical and practical components of successful public speech which occurs at social scenes. Knows the background and operational mechanism of effective public speech. Owns the ability of creating and giving effective speech in practice.						
			Ability Owns the ability of finding a way in the approach of rhetoric, namely he/she can interpret rhetoric as a way of thinking and speaking. Owns the ability of interpreting rhetoric as a way of public communication, as a strategic activity. Owns the ability of adequate analysis and evaluation of public communication. Owns the ability of creating and giving simple, well-structured speech based on his/her preparedness.						
			Attitude He/she can accept the way of rhetoric speech bravely and consistently based on the knowledge of narrative and pragmatic way of human recognition. He/she is open to listen to others' opinion, to its consideration and to the disputation at the same time he/she is ready to represent confidently his/her view. He/she is sensitive to social problems, committed to democratic values.						
			Autonomy and responsibility He/she decides responsible in professional questions and realizes if there is any need to cooperate with others in solving the occurrent problems. He/she tackles initiary role for the sake of validation of social perception represented by him/her. He/she expresses his/her views as a sovereign participant and/or represents his/her own group.

Correspondence	150/15		5		10		0	(Continuous assessment)		
Teacher responsible for the course				Name		Dr. László Balázs			Position	Associate Professor
Educational goals				The objective of the course is that students acquire the conceptual and procedural toolkit of organizational psychology and organizational development. Further objectives are that students are able to identify organizational processes, and perceive organizational change. Students should be aware of the underlying mechanisms of organizational operations.						
				On the basis of social psychological approaches, the objective of the course is that students gain deeper theoretical and practical knowledge in the area of organizational psychology, thus supporting the processes of organizational development. The course develops the following individual competences: Thinking at structural level; critical thinking; cooperative competences						
Typical delivery methods				Lecture		In a classroom with the use of projector or computer in each lecture.				
				Seminar		In seminar rooms seating 20-30 people, with the use of a projector. Individual, pair and group work; case study analysis. Student presentations, evaluation.				
				Laboratory						
Requirements (expressed in learning outcomes/competencies to be acquired)				Knowledge						
				Students understand the conceptual repertoire of organizational psychology and development. They know the underlying psychological mechanisms and impacts of organizational operations. They have acquired the theories of change at organizational levels. They know the phases of organizational changes, and their most important methods.						
				Ability						
				Students are able to properly use the concepts of the field for the synthesis of processes and the development of conclusions. They are able to identify hidden mechanisms, and the use of their impact. Students are able to approach problems through thinking at the level of the organizational structure.						
				Attitude						
Students are open and receptive to changes to the events of organizational culture. They are sensitive to the problems and challenges proper to organizational procedures. They are open to learning and using methods for organizational development.										
Autonomy and responsibility										
Students take responsibility for their own decisions. They take responsibility for the development of their workplace environment.										
Brief description of the subject content				See 13-week schedule						
Activity forms of students				Note taking and synthesis of lectures. Participation in cooperative activities and role-play; the analysis of case studies;

Subject name		In Hungarian		Fenntartható fejlődés és társadalmi felelősségvállalás				Szintje	A	
		In English		Sustainable development and corporate social responsibility				Level	A	
Subject code				DUEN-TKM-213						
Responsible educational unit				Institute for Social Sciences Department of Communication and Media						
Name of Mandatory Preliminary Study										
Number of Lessons								Requirements	Credits (ECTS)	Language of Education
		Lecture		Seminar		Laboratory				
Full-time	150/39		1		2		0	CA	5	English
Correspondence	150/15		5		10		0	(Continuous assessment)		
Teacher responsible for the course				Name		Dr. habil István András			Position	College Teacher
Educational goals				The objective of the course is that the students become familiar with the historical development and current concepts and debates about sustainable development, corporate social responsibility, and their communication. Students will have insight into the macro- and micro-level processes of CSR at an individual as well as corporate level. Students will know the conceptual difference between PR and CSR, and the communicative specificities of CSR. The objective of the course is to impart comprehensive knowledge about the processes of the social environment of businesses and economic activities, and the specifics of CSR communication. The foci of the course consist in individual and group responsibility, and their systemic approach. The course aims to improve competences in the subject area.						
Typical delivery methods				Lecture	In a classroom with the use of projector or computer in each lecture. Lectures and note taking.					
				Seminar	In a classroom with the use of projector or computer in each seminar. Pair and group work.					
				Laboratory						
Requirements (expressed in learning outcomes/competencies to be acquired)				Knowledge Students learn about the conceptual and methodological tool kit of sustainable development studies. They are aware of the definitions, operations and main fields of CSR. They see the differences and interrelations of PR and CSR. They are aware of the communication processes that are proper to sustainable development and corporate social responsibility.						
				Ability Students are able to identify and argue for processes that serve sustainable development and CSR from a communication point of view. They are able to organize communication processes that assist processes and developments in the subject area. They are able to define the main differences, and identify potential interfaces between CSR and PR. Students are able to articulate scientifically informed arguments, and participate in CSR and sustainable development related debates and dialogues.						
				Attitude Students take responsibility for their actions and their consequences for the group, the community and the organization. They accept and identify with group responsibility. Students possess a critical attitude with regards to the discourses that concern sustainable development and CSR. They are committed

		In English	Business negotiation and presentation					Level	A
Subject code			DUEN-TKM-124						
Responsible educational unit			Institute for Social Sciences Department of Communication and Media						
Name of Mandatory Preliminary Study									
			Number of Lessons				Requirement	Credits (ECTS)	Language of Education
		Lecture	Seminar		Laboratorys				
Full-time	150/39		1		2	0	CA (Continuous assessment)	5	English
Correspondence	150/15		5		10	0			
Teacher responsible for the course			Name			Dr. Tamás Kókuti		Position	College Professor
Educational goals			The goal of the course is to develop the essential skills required of employees at the workplace and to expand students' negotiating, negotiator and presentation skills. Within these fields students will get to know the main differences and similarities between different types of presentations, therefore, students will be able to navigate among types and situations of business negotiation in order to synthesize and apply them in practice. Certain presentation and negotiation outputs will be clarified during the course. by the end of the semester students will be familiar with the necessary social, psychological and cultural competencies required for successful business presentation.						
Typical delivery methods			Lecture			In a classroom with the use of projector or computer in each lecture.			
			Seminar			In a classroom with the use of projector or computer in each seminar with the application of group work, role play and simulation activities.			
			Laboratory						
Requirements (expressed in learning outcomes/competencies to be acquired)			<b>Knowledge</b> Students as potential business negotiators and communicators know: <ul style="list-style-type: none"><li>the types, terminology and main principles of negotiation and business presentation</li><li>the steps of making effective business presentation</li><li>how to structure business presentation</li><li>how to recognize problem solving techniques in company environment</li></ul>						
			<b>Ability</b> Students will be able to: <ul style="list-style-type: none"><li>make a business negotiation plan and collect as much information as possible about the other side,</li><li>make decisions necessary for successfully performing a business presentation and carrying out a negotiation process</li><li>to recognize, define and effectively communicate the terminology of the discipline</li></ul>						
			<b>Attitude</b> Good business presenters are patient, well-educated and have empathy. Good, future-oriented bargainers respect their counterpart, are trustworthy and not aggressive. They are open and willing to discuss all points of the negotiation process, and to structure well a business presentation as well as express their opinion. They are open to the novelty of the professional sphere.						
			<b>Autonomy and responsibility</b> Is capable of own opinion formation on professional and social forums. Responsibly

2020

Subject name		In English		Short Film Making				Level	A		
		In Hungarian		Rövidfilm készítés				Code	DUEN-TKM-121 DUEL-TKM-121		
Responsible Educational Unit				Institute for Social Sciences, Department of Communication and Media Science							
Name of Mandatory Preliminary Study				Editing Motion Picture and Sound Record							
Number of Lessons per a Week						Requirements		Credit (ECTS)	Language of Education		
		Lecture		Seminar							Laboratory
Ful-time	150/39		1		0		2	F	5	Hungarian	
Correspondence	150/15	Semester	5	Semeter	0	Semester	10				
Teacher responsible for the course				Dr. Péter Ludik					Position	associate professor	
Educational goals				Aims							
				The aim of the course is to study and depen students' knowledge in Short Film Making. Based on their previous studies the students could gain basic knowledge in the field of the theory and practice of cinematography and sound recording and based upon these they are able to acquire the prfessional tricks of film making. They can gain practice in making and realizing different kinds of film genres.							
				After fulfilling the practice the student must be able to do tasks individually and independently both at inside (for instance among artificial scenery in a studio) and outside shooting spots.							
Typical delivery methods				The aim of the course is to develop students' theoretical and practical audiovisual knowledge.							
				Lecture							
				Seminar			TV studio, classroom supplied with blackboard and projector, PC environment, sound and video editing, graphical softwares				
Requirements (expressed in learning outcomes/competencies to be acquired)				Labortory			Lecture carried out with blackboard aided with computer and projector.				
				Knowledge							
				The student is able to maintain confidently the tools of shooting and record sound and motion pictures. The student is able to plan a short film production from story telling and visual aspects as well and is able to produce it with his/her peers. The student has the knowledge of understanding the director's instructions. He/she can carry out post-production tasks individually in the editing room.							
				Ability							
				The student must be able to determine the parameters and services of softwares needed for producing and editing the sources (texts, sound, motions and still pictures, graphics) He/she digitalizes and edits sound and video.							
				The student is able to understand and make synopsis, screenplay, dispository book and stroyboard.							

# Communication and Media Science

2020

	<p><b>Attitude</b></p> <p>The student is open-minded, interested, critical, creative, full of with ideas.</p> <p>He/She endeavors to train himself/herself continuously.</p>
	<p><b>Autonomy and responsibility</b></p> <p>The student is able to create own opinion and make individual professional work. He/she plans the phases and processes of different kinds of multimedia elements. He/she is able to realize his/her concepts in an appropriate professional level and fastidious way. He/she feels responsibility for the work of his/hers and for the tasks of the group lead by him/her.</p>
<b>Brief description of the subject content</b>	<p>Film genres. Professional expressions. Job descriptions, the possibilities and duties of movie professionals. Synopsis, screenplay, dispostry book, storyboard. The motion picture as a scene. The jobs of a cameraman. Lightings. Shooting among scenery. Recording sound (talk, music, noise) and picture Shooting with more cameras. The director, directing, role play. Dramaturgy. The film space and time. Relations of pictures – editing.</p>
<b>Activity forms of students</b>	<p>Understanding speech and taking notes from it: 40%, Organizing infromations lead with tasks: 30%, Processing tasks individually: 10%, Completing test: 20%, Group work</p>
<b>Compulsory reading and its availability</b>	<p>Szabó Gábor: Filmes könyv. Hogyan kommunikál a film?, Ab Ovo, Bp. 2002. Kézikönyv Film &amp; TV alkotóknak. Összeállította: Vagyóczky Tibor, Bp. 2009.</p> <p>Kovács András Bálint: Mozgóképelemzés, Palatinus, 2009.</p>
<b>Recommended reading and its availability</b>	<p>A televíziós műsorkészítés alapismeretei (Jegyzet) - Szerkesztette: Babiczky László, Szegedi Tudományegyetem Budapest Média Intézet, 2002.</p> <p>Jákó Péter: Digitális hangtechnika, 2005. Kossuth Kiadó Tom Ang: Digitális videózás kezdőknek és haladóknak, 2007. Park könyvkiadó Chris Middleton: Kreatív digitális zene és hang, Sclar Kiadó, 2006. Andreas Holzinger: A multimédia alapjai, Kiskapu Kiadó, 2004.</p>
<b>Hand-in Assignments/ measurement reports</b>	<p>It is compulsory for the students in teams (couple of students in one team) – creating a shooting crew – to make 2 short films (min. 4-5 minutes each) and store it to a data storage with the 2 documentations about them and give it to the teacher until week 12. If it is possible, they need to create one of the short films mostly with inside scenes while the other should include outside scenes. For each short film students can get 30 points, all together they can get 60 points for them. To get the end term grade it is compulsory to hand in the videos. If a student did not participate in making at least 2 short films during the study period, he/she cannot complete it in the exam period, so the course cannot be completed for him/her.</p>
<b>Description of midterm tests</b>	<p>During the semester the student has to write one written test for 40 points from the learnt knowledge he/she acquired. The written test is on week 13. The total 100 points can be gained from the short films, documents and the midterm test.</p>
